

Core memory tasks and representation availability

representative validation episode

frozen encoder + projector

Transient-marker recall

categorical cue

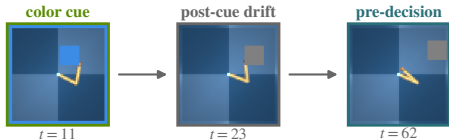

Acc. 1.000

meets gate

gate ≥ 0.750

Drifting-color recall

categorical cue

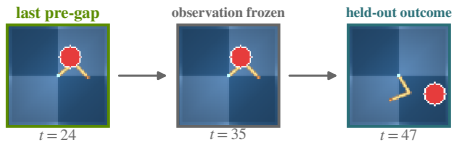

Acc. 1.000

meets gate

gate ≥ 0.750

Occluded-target prediction

continuous target

$R^2=0.010$

availability
not established

gate ≥ 0.300
