

# CLAIM LADDER LEDGER

Rows are not pooled: each environment answers a different interface question.

|           | demand | retention | host exposure | execution/use | paper role              |
|-----------|--------|-----------|---------------|---------------|-------------------------|
| PushT     | pass   | pass      | pass          | pass          | visual binding use gate |
